

## Cytokinetics Announces Upcoming Presentations at the HCMS Scientific Sessions and the HFSA Annual Scientific Meeting

September 19, 2024 8:00 PM EDT

*Analyses of Effects of Aficamten on Key Clinical Outcomes from SEQUOIA-HCM to be Featured in Late Breaking Clinical Trial Presentation at HFSA*

SOUTH SAN FRANCISCO, Calif., Sept. 19, 2024 (GLOBE NEWSWIRE) -- Cytokinetics, Incorporated (Nasdaq: CYTK) today announced three upcoming presentations at the Hypertrophic Cardiomyopathy Medical Society (HCMS) Scientific Sessions on September 27, 2024 and one Late Breaking Clinical Trial presentation at the Heart Failure Society of America (HFSA) Annual Scientific Meeting, taking place September 27-30, 2024, both in Atlanta, GA.

### 2024 HCMS Scientific Sessions

#### Oral Abstract Presentation

**Title:** Global Remodeling Changes with *Aficamten* in Patients with Obstructive Hypertrophic Cardiomyopathy: An Analysis of the SEQUOIA-HCM Trial  
**Presenter:** Anjali T. Owens, M.D., Medical Director, Center for Inherited Cardiac Disease, Assistant Professor of Medicine, University of Pennsylvania  
**Date:** September 27, 2024  
**Session Title:** Oral Abstract Presentations  
**Session Time:** 11:00 – 12:00 PM ET  
**Location:** Signia by Hilton, Atlanta Georgia World Congress Center

#### Poster Abstract Presentation

**Title:** Efficacy and Safety of *Aficamten* in Patients with Obstructive Hypertrophic Cardiomyopathy and Very High Left Ventricular Outflow Tract Gradients  
**Presenter:** Juan R. Gimeno, M.D., Consultant Cardiologist, Hospital Universitario Virgen de la Arrixaca, Associate Professor, Medicine – Cardiology, Universidad de Murcia, Spain  
**Date:** September 27, 2024  
**Session Title:** Closing Remarks & Poster Cocktail Reception  
**Session Time:** 4:00 – 5:00 PM ET  
**Location:** Signia by Hilton, Atlanta Georgia World Congress Center

**Title:** Beta-Blocker Use and Incidence of New Atrial Fibrillation or Flutter Requiring Therapy in Post-Septal Myectomy Hypertrophic Cardiomyopathy Patients  
**Presenter:** Morris M. Kim, M.D., Cardiovascular Disease Fellow, Oregon Health & Science University  
**Date:** September 27, 2024  
**Session Title:** Closing Remarks & Poster Cocktail Reception  
**Session Time:** 4:00 – 5:00 PM ET  
**Location:** Signia by Hilton, Atlanta Georgia World Congress Center

### HFSA Annual Scientific Meeting

**Title:** Global Clinical Impact of *Aficamten* in Obstructive Hypertrophic Cardiomyopathy: Results From SEQUOIA-HCM  
**Presenter:** Martin Maron, M.D., Director, Hypertrophic Cardiomyopathy Center, Lahey Hospital and Medical Center  
**Date:** September 30, 2024  
**Session Title:** Plenary Sessions - Monday Plenary Session: Late Breaking Clinical Research Session II  
**Session Time:** 9:00 – 10:30 AM ET  
**Presentation Time:** 9:20 – 9:28 AM ET  
**Location:** Georgia World Congress Center - Georgia Ballroom 2

### About Cytokinetics

Cytokinetics is a late-stage, specialty cardiovascular biopharmaceutical company focused on discovering, developing and commercializing muscle biology-directed drug candidates as potential treatments for debilitating diseases in which cardiac muscle performance is compromised. As a leader in muscle biology and the mechanics of muscle performance, the company is developing small molecule drug candidates specifically engineered to impact myocardial muscle function and contractility. Cytokinetics is preparing for regulatory submissions for *aficamten*, its next-in-class cardiac myosin inhibitor, following positive results from SEQUOIA-HCM, the pivotal Phase 3 clinical trial in obstructive hypertrophic cardiomyopathy which were published in the *New England Journal of Medicine*. *Aficamten* is also currently being evaluated in MAPLE-HCM, a Phase 3 clinical trial of *aficamten* as monotherapy compared to metoprolol as monotherapy in patients with obstructive HCM, ACACIA-HCM, a Phase 3 clinical trial of *aficamten* in patients with non-obstructive HCM, CEDAR-HCM, a clinical trial of *aficamten* in a pediatric population with obstructive HCM, and FOREST-HCM, an open-label extension clinical study of *aficamten* in patients with HCM. Cytokinetics is also developing *omecamtiv mecarbil*, a cardiac muscle activator, in patients with heart failure. Additionally, Cytokinetics is developing CK-586, a cardiac myosin inhibitor with a mechanism of action distinct from *aficamten* for the potential treatment of HFpEF.

### Forward-Looking Statements

This press release contains forward-looking statements for purposes of the Private Securities Litigation Reform Act of 1995 (the "Act"). Cytokinetics disclaims any intent or obligation to update these forward-looking statements and claims the protection of the Act's Safe Harbor for forward-looking statements. Examples of such statements include, but are not limited to, statements relating to Cytokinetics' and its partners' research and development activities of Cytokinetics' product candidates. Such statements are based on management's current expectations, but actual results may differ materially due to various risks and uncertainties, including, but not limited to the risks related to Cytokinetics' business outlined in Cytokinetics' filings with the Securities and Exchange Commission. Forward-looking statements are not guarantees of future performance, and Cytokinetics' actual results of operations, financial condition and liquidity, and the development of the industry in which it operates, may differ materially from the forward-looking statements contained in this press release. Any forward-looking statements that Cytokinetics makes in this press release speak only as of the date of this press release. Cytokinetics assumes no obligation to update its forward-looking statements whether as a result of new information, future events or otherwise, after the date of this press release.
